RE: Foundation Wrapping

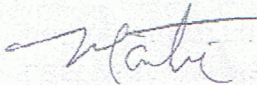

Dear Mr. Aubit:

This letter is a follow-up to our conversation today regarding the basement wrap you installed in November of 2005 for our leaky basement in Mendon, VT. I'm sure you know that both this year and last, we have experienced a substantial amount of rain here in the mountains. I'm pleased to report that despite this, our basement remains bone-dry.

Last year, we watched with trepidation as the rainwater cascaded over our perimeter drainage ditch during a particularly heavy downpour. Sheets of runoff ran over our lawn and came within 30 feet of our house. Not a drop was found in our basement.

I'd like to thank you for both your fine installation work and follow-up. To me, your consistent checking-in to see how we are doing has demonstrated that you are committed to our complete satisfaction.

Regards,

Tom Martin
