The Light-Basement Windows

Have you looked at your basement windows lately? Are they old, rotting and not very energy efficient?

Basement Technologies offers "The Light" basement windows.

"The Light" Basement Window is a high quality, durable window that is easy to install, operate, and maintain. Designed specifically for basements, the "The Light" Basement Window has many new standard features found only on this unit. Basement Technologies proudly introduces the basement window for a new century of construction with Basement Technologies.

Basement window installation has never been easier with the "The Light" Basement Window. Designed to fit the entire depth of foundation forms, the "The Light" Basement Window is fast and easy to install without the need for pouring buck extensions or additional braces.

Full and nominal 8" frame depths provide a fast, hassle-free installation without pouring bucks to save time and money.

Header, sill, and jamb pieces can be removed from the Universal Frame and replaced and/or reversed to quickly repair damaged or backward/upside-down windows.

Temporary wooden bracing, included with every window, keeps the window square, provides a way to hang the window in the wall, and protects the sill from being damaged by concrete chutes.

Plastic film covers front and back of the window, keeping the window clean from concrete, dirt, and spray coatings.

" extension piece attaches to window for full or nominal 10" pours, reducing the number of windows needed in inventory.

Window shipped "ready-to-pour" with sash and screen secured inside the frame for a no hassle – no return trip installation.

Eight standard sizes available, including egress sizes, to accommodate any application. (Custom sizes available.)

All vinyl construction and dual pane insulated glass offer improved thermal efficiency and added protection from the elements.

Dual operating sashes easily remove when not locked, making clean up a snap.

Dual weather stripping on the sash makes a tight seal from weather conditions.

All this plus much more!

Another reason Basement Technologies is the leading name in the basement waterproofing industry.
