Features

An adjustable humidistat to control the level of dryness

A convenient drain port for hose attachment and draining to our Water Trek Aqua Route System® or a drywell.

Basement Technologies unique "Hot Gas" defrosting feature which automatically melts away frost buildup providing effective operation at ambient temperatures down to 40° F.

Optional ducting

- Handles up to 3,000 square feet of basement

Performance

Under operating conditions of 80° F and 60% Relative Humidity (a standard used for comparative performance of industrial dehumidifiers), the Basement Technologies Air Mop® 2 Heavy Duty Industrial/Marine Dehumidifier will remove up to 90 pints of harmful water vapor per day even in extreme environments, between 40° F and 150° F. The Basement Technologies Air Mop® 2 Heavy Duty Industrial/Marine Dehumidifier is definitely not "another pretty face" but a tough, self-sufficient performer.
